

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (Previously presented) A baby feeding bottle, comprising:
a dispenser body having an upper opening and a hollow interior;
a flexible fluid container supported by the dispenser body within the interior of the dispenser body; and
an elongated flow tube at least partially connected to an interior sidewall of the fluid container, the flow tube having a first end disposed adjacent to the upper opening of the dispenser body, and a second end disposed within the flexible fluid container;
wherein the flow tube facilitates passage of fluid within the fluid container and to the upper opening of the dispenser body.
2. (Previously presented) The baby feeding bottle of claim 1, wherein the flow tube includes a plurality of apertures along the flow tube through a sidewall thereof.
3. (Original) The baby feeding bottle of claim 1, including a casing which engages the dispenser body to enclose the flexible fluid container.
4. (Original) The baby feeding bottle of claim 1, wherein the flow tube and fluid container are approximately the same length.
5. (Original) The baby feeding bottle of claim 1, wherein the dispenser body includes a mouthpiece in fluid flow communication with fluid contained within the flexible fluid container.
6. – 7. Canceled

8. (Previously presented) The baby feeding bottle of claim 1, wherein the flow tube extends through the dispenser body and the fluid container at least partially towards central portions of the dispenser body and the fluid container.

9. (Previously presented) The baby feeding bottle of claim 8, wherein the flow tube includes a plurality of apertures along the flow tube through a sidewall thereof.

10.-12. Cancelled

13. (Previously presented) A baby feeding bottle, comprising:
a dispenser body having an upper opening and a hollow interior;
a flexible fluid container supported by the dispenser body within the interior of the dispenser body; and
an elongated flow tube connected to an interior sidewall of the fluid container, the flow tube having a first end disposed adjacent to the upper opening of the dispenser body, and a second end disposed within the flexible fluid container;
wherein the flow tube facilitates passage of fluid within the fluid container and to the upper opening of the dispenser body and includes a plurality of apertures along the flow tube through a sidewall thereof, wherein the flow tube and fluid container are approximately the same length.

14. (Original) The baby feeding bottle of claim 13, wherein the dispenser body includes a mouthpiece in fluid flow communication with fluid contained within the flexible fluid container.

15. (Original) The baby feeding bottle of claim 14, including a casing which engages the dispenser body to enclose the flexible fluid container.

16. (Previously presented) A baby feeding bottle, comprising:
a dispenser body having an upper opening and a hollow interior;

a flexible fluid container supported by the dispenser body within the interior of the dispenser body; and

an elongated flow tube at least partially connected to an interior sidewall of the fluid container, the flow tube extending through the dispenser body and the fluid container at least partially towards central portions of the dispenser body and the fluid container, the flow tube having first end disposed adjacent to the upper opening of the dispenser body and a second end disposed within the flexible fluid container;

wherein the flow tube facilitates passage of fluid within the fluid container and to the upper opening of the dispenser body and includes a plurality of apertures along the flow tube through a sidewall thereof, and wherein the flow tube and fluid container are approximately the same length.

17. (Original) The baby feeding bottle of claim 16, wherein the dispenser body includes a mouthpiece in fluid flow communication with fluid contained within the flexible fluid container.

18. (Previously presented) The baby feeding bottle of claim 17, including a casing which engages the dispenser body to enclose the flexible fluid container.

19.-20. Cancelled
